Biography

Cary Trivanovich is both a comedic performer and a speaker. Cary has inspired audiences in over 4000 schools, colleges, conferences, corporate and faith-based events throughout virtually every state across America with his unique mix of keynote message and pantomime. Apart from speaking engagements, his unique performance has been enjoyed in theatres, theatre festivals, colleges and cruise ships around the world.

His performance is unlike anything in the world, prompting one Los Angeles critic to describe him as "a remarkably prodigious talent." He has captivated and captured the respect of each and every audience he has faced, even high schools – thousands of them – irrespective of their location or behavioral history. This performance routinely draws reactions from high school administrators like, "The best assembly we have had... it ran into lunch by choice of the students," "Magnificent! Totally captivated a difficult audience," and "Standing ovation after encore." This unique performance has defied the seemingly natural law that high school audiences need supervision or "control" to keep them in line.

The other aspect of Cary's significance is that he is noted for being America's premier speaker on school bullying, having addressed the need full-time since a decade before the internet and long before bullying came to the forefront of concern in America's schools. He has led the charge of addressing bullying in thousands of schools, education and community forums, and conferences throughout the United States and Canada.
